THE ROCKETFELLERS

PREVIOUSLY...

On the run from authorities in the 25th century, The Rocketfeller family hides in the year 2025. As they adjust to their seemingly ancient surroundings, they try to maintain as much normalcy—like going to school—as possible. But the hunters of the 25th century creep ever closer...

RICHIE ROCKETFELLER

AGE: 13 **HEIGHT:** 5' 2"

WEIGHT: 110 lbs

EYES: Brown **HAIR:** Auburn

FIRST APPEARANCE: GHOST MACHINE #1 (2024)

HISTORY: In his native era of the 25th century, high school freshman Richie Rocketfeller had a lot going for him. A girlfriend. Potential scholarship in science from the best universities on Earth. A slam dunk champion in rocketball.

But since his family abruptly left home to hide in the practically ancient 21st century, Richie has been deeply unhappy separated from what he felt was his best life. And, what's worse, he is forbidden from using any future technology, particularly flying with his rocket boots.

Richie blames his father for their situation, and for taking something he shouldn't have from the corporate conglomerate Cronex, which hunts them through space and time. Now, thanks to his Uncle Reggie, the Time Zone Protection Program has relocated the family to keep them safe.

For now, he remains focused on making his situation bearable. With little effort, he hacked a Russian mob's offshore bank account to help pay for his family's needs.

And he also has a project he's kept secret from his family, one that he believes will make his life even better.

That said, the 21st century has its perks. He can now eat real food instead of synthetic pills, developing a sweet tooth he never knew was possible. In fact, another of his side projects is manufacturing his own candy, which he hopes to take back with him to a 25th century that seemingly forgot about the charm of confectionary delights.

ABILITIES: Strong-willed and strategic like his mother, and a razor-sharp mind for science like his dad, Richie lacks the maturity to wield both traits. But he has a kind heart, which will theoretically help him make better decisions as he gets older. ●
